DISTECH CONTROLS™

Multi-Site Retail

Scalable, Open Solutions For Multi-Site Locations

Advanced building management systems designed to meet the demands of today's multi-site retailers.

Can your multi-site locations be managed more efficiently?

Every store chain is unique, whether in the products they offer, the customers they target, or the values and the brands they offer. However, whether you are a convenience store, box retailer, quick serve restaurant, supermarket, or pharmacy, all retailers have one thing in common, their stores must be welcoming, attractive, and efficient to ensure profitability and customer loyalty.

Distech Controls allows you to identify energy-saving opportunities across all locations with performance metrics to keep stores running optimally. Whatever the requirement, Distech Controls has flexible and scalable solutions to create an open, future-ready platform for your specific business needs.

Ensure that all your retail sites will be comfortable, efficient, and welcoming.

Customers
Create a unique personal experience for your customers by optimizing HVAC and lightning for a consistent, comfortable, and safe shopping experience.

Energy Managers
Distech Controls' programming sequences along with global set-points and schedules help maximize efficiency and accelerate return on investment. Leverage performance metrics and identify energy-saving opportunities across all locations to keep stores running smoothly.

Facility Managers
Distech Controls provides an open, future-ready platform that improves overall building performance while reducing unexpected service calls and equipment downtime.

Open Systems: The Safest Investment for Multi-Site Retail Stores

Building systems have traditionally been proprietary and not flexible. Proprietary systems speak different languages, resulting in incomplete visibility, data, and reliability, and leave you tied to one, often expensive, service provider.

In contrast, Distech Controls' commitment to open protocols and industry IT standards, combined with our best-of-breed technology offering, creates a sustainable foundation that supports and evolves with your building system's life cycle.

Increase overall staff productivity and satisfaction by offering a comfortable, and safe work environment.

Connected Building Solutions

How Connected Building Solutions Help Manage Multi-Site Retail Locations

Multi-System Integration for Shopper Satisfaction
Link our building automation system with 3rd party software via our open RESTful API to create apps that engage your shoppers. By integrating with building services you can easily offer indoor positioning and help navigate shoppers to current, promotions, products, or store information.

How Connected Building Solutions Help with Operations

Reporting, Analytics & Dashboards
Easy to generate and use, our reporting software can show trends, space utilization, alarms, maintenance issues, energy usage, and more. Customized dashboards analyze data and give each stakeholder the views they need.

Optimize Energy Savings and Responsiveness
Once the various monitoring and control functions required in your facility have been programmed into your building automation system, you can apply sophisticated programming sequences to achieve energy and costs savings, as well as improve shopper experience, comfort, and speed of response to any maintenance issues that arise.

Did you know? Incorporating open and future-ready systems into your facilities allow you to adapt and stay ahead of evolving shopping trends.
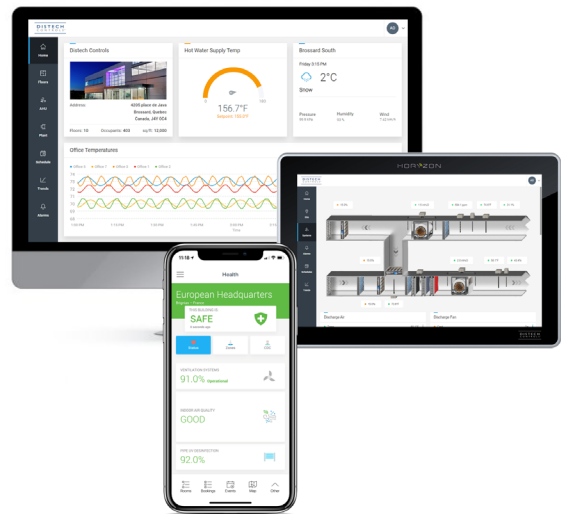

Products

ECLYPSE Controller Series
Connected IP and wi-fi product series

ENVYSION
Responsive, web-based graphic design and visualization interface

Allure UNITOUCH and *my* PERSONIFY
State-of-the-art touchscreen user interface and mobile application

EC-Net
Web-based multi-protocol building automation and energy management platform

Connecting people with intelligent building solutions for better health, better spaces, better efficiencies.

Distech Controls has set the standard in the industry for innovative, cost-effective, and truly open building and energy management systems that help increase operational savings and sustainability throughout the life cycle of your facilities.

Distech Controls offers open and scalable solutions for any size store from:

- Convenience stores
- Quick service restaurants
- Casual dining
